

The Law Enforcement Handbook Fourth Edition

Desmond Rowland and James Bailey
With Detective Stephen Rowland

ISBN 0-17-650127-4 • Copyright ©2010 • Published

The *Law Enforcement Handbook* is designed to provide the basic grounding a police officer requires to perform effectively while carrying out the duties of a patrol officer or criminal investigator. Because the division between patrol and investigative duties varies considerably among police forces, and may not exist in smaller departments, the author has taken a comprehensive approach that follows the officer from the initial stop of a suspect on the street to testimony in court.

This book can be used as a core text for recruit training, as a handbook for more experienced officers, as a training manual for security personnel without prior police experience, or as a resource book in university police science courses. A thorough mastery of the material presented in this book will provide the information required to handle virtually all normal police duties, up to and including major criminal investigations.

Written by one of Canada's most distinguished police executives and criminal investigators, Desmond Rowland, this book offers a practical approach to the police profession. Designed to provide quick access to detailed information, it will serve as a useful reference for police officers and security personnel of all levels.

"I am absolutely convinced that The Law Enforcement Handbook will continue to be a significant factor in expanding the knowledge base of both new and seasoned police officers across Canada".

– Julian Fantino, Commissioner,
Ontario Provincial Police
